PROFESSIONAL PROFILE

Dr. Susan Borghoff is based in Research Triangle Park, NC. She is a board-certified toxicologist with over 35 years of experience designing and managing diverse research programs and regulator-driven *in vitro* and *in vivo* toxicology studies for commercial and federal clients. Her work has also included scientific and technical oversight, data analysis and interpretation, and preparation of both Final GLP Study Reports for regulatory submission and peer-reviewed scientific manuscripts. Dr. Borghoff has directed scientific research to support dose-response and hazard identification for incorporation into human health risk assessments.

Dr. Borghoff is a recognized expert on mechanisms by which agents cause toxicity, modulate endocrine pathways, and cause cancer in rodents, and the relevance of these responses for assessing human risk. Most recently, she has been involved in evaluating mechanistic data combined with experimental cancer animal studies to assess the potential of selected sweeteners to cause cancer in humans. Her research also has focused on understanding the metabolism and pharmacokinetics of agents using physiologically based pharmacokinetic (PBPK) models for extrapolation of risk to humans. She has been involved with critical reviews of toxicity and carcinogenicity studies, advising on specific study designs to fill data gaps for understanding modes/mechanisms of action, and as an Expert Panel member for scientific oversight of industry-sponsored toxicity and carcinogenicity testing programs. Dr. Borghoff's experience also includes implementing a program to conduct GLP regulatory studies associated with the US Environmental Protection Agency (USEPA)-mandated Endocrine Disruption Screening Program (EDSP) and co-chairing a workshop titled, "Lessons Learned, Challenges, and Opportunities: The US Endocrine Disruptor Screening Program," held in Research Triangle Park in 2013, to assess this program.

Dr. Borghoff has served as a reviewer on a number of panels and working groups for international organizations, including USEPA, National Cancer Institute, International Programme on Chemical Safety (IPCS), European Centre for Ecotoxicology and Toxicology of Chemicals (ECETOC), and three Monograph Working Groups (vol. 73, 77, and 82) of the International Agency for Cancer Research (IARC), in addition to acting as Observer for Monograph vol.115, Some Industrial Chemicals. She was also an observer at the advisory group meeting to recommend priorities for the IARC Monographs during 2020–2024 (March 2019). She has been a reviewer for various grants through the National Institutes of Health (NIH), the National Institute of Environmental Health Sciences (NIEHS), and USEPA, and has been a panel member on the Voluntary Children’s Chemical Evaluation Program (VCCEP).

Over the last 8 years, Dr. Borghoff has been involved in the development of various biological (e.g., monoclonal antibodies) and small-molecule products for different disease indications, such as rheumatoid arthritis, NASH, solid tumors, and diabetic foot infections. She also has experience in the design, monitoring, and interpretation of nonclinical toxicology and pharmacology studies (GLP and non-GLP), and has written the nonclinical sections of investigational new drug (IND) applications for both biopharmaceutical and pharmaceutical agents.

Dr. Borghoff received the Frank R. Blood Award in 1994 for the best paper of the year published in a Society of Toxicology (SOT) research journal, and an SOT Risk Assessment Specialty Section Award in 2000. She is a member of SOT’s North Carolina Chapter, and at the national level, has served on SOT Council, as well as various committees (e.g., Program, Awards, Education). Most recently, Dr. Borghoff was a member of SOT’s TSCA Reform Task Force and was the Audit Committee Co-Chair. She has also served as an Associate Editor for *Toxicological Sciences*, along with other editorial positions for several scientific journals, and is currently on the editorial board of the *International Journal of Toxicology*.

Dr. Borghoff received her Ph.D. and MSPH in Environmental Sciences and Engineering from the University of North Carolina, and a B.S. in Chemistry from East Stroudsburg University in Pennsylvania. Dr. Borghoff became a Diplomate of the American Board of Toxicology in 1994.

EDUCATION AND DEGREES EARNED

Doctor of Philosophy (PhD)
Environmental Sciences and Engineering
University of North Carolina

Master of Science in Public Health (MSPH)
Environmental Sciences and Engineering
University of North Carolina

Bachelor of Science (BS)
Chemistry (*magna cum laude*)
East Stroudsburg University

CERTIFICATIONS

Diplomate, American Board of Toxicology (Recertification: 1999, 2004, 2009, 2014, 2020)

PROFESSIONAL AFFILIATIONS

1984–Present	North Carolina Chapter of the Society of Toxicology
1986–Present	Society of Toxicology (Full Member over 35 yrs)
2019–Present	American Society for Cellular and Computational Toxicology
2015–2017	Audit Committee; Co-chair 2015, Chair 2016 (appointed)
2013–2016	TSCA Reform Task Force (appointed)
2009–2011	Councilor (elected)
2005–2008	Education Committee (elected)
2002–2004	Awards Committee (elected)
1999–2004	Program Committee (appointed)
2002–2004	Secretary/Treasurer of BMSS
2007–Present	American College of Toxicology
2013–Present	SETAC (Society of Environmental Toxicology and Chemistry)
2018–Present	Toxicology Forum
1992–2010	International Society for the Study of Xenobiotics
2003–2010	RTP Drug Metabolism Discussion Group (Executive Board)

AWARDS AND HONORS

2017	Recognized by the Biological Modeling Specialty Section of the Society of Toxicology for publication of one of the top nine modeling papers in 2017: Borghoff SJ, Ring C, Banton M, Leavens TL. 2016. Physiologically based pharmacokinetic model for ethyl tertiary-butyl ether and tertiary-butyl alcohol in rats: Contribution of binding to α 2u-globulin in male rats and high-exposure nonlinear kinetics to toxicity and cancer outcomes. J Appl Toxicol 37(5):621–640, doi 10.1002/jat.3412.
2000	Society of Toxicology Risk Assessment Specialty Section Award for outstanding presentation in risk assessment: “A physiologically-based pharmacokinetic model for methyl tert-butyl ether in humans” (Student Award—Amy Collins Licata).
1994	Frank R. Blood Award for Outstanding Paper published in SOT journal: Borghoff SJ, Lagarde WH. 1993. Assessment of binding of 2,4,4-trimethyl-2-pentanol to low-molecular weight proteins isolated from kidneys of male rats and humans. Toxicol Appl Pharmacol 119:228–235.
1987	National Kidney Foundation Research Fellowship, North Carolina Society of Toxicology—Study Travel Award
1986	National Society of Toxicology—Study Travel Award
1982–1987	Public Health Traineeship—University of North Carolina

EDITORIAL AND REVIEWER ACTIVITIES

Associate Editor

Toxicological Sciences (2004–2008)—focus on reviews associated with PBPK models, pharmacokinetics, endocrine disruptors, kidney toxicity, and cancer

Editorial Board

International Journal of Toxicology (2014–present)

Chemico-Biological Interactions (2000–2008)

Toxicological Sciences (2000–2003)

Toxicology Letters (1995–2000)

Ad Hoc Reviewer

Regulatory Toxicology and Pharmacology

Environmental Health Perspectives

Toxicology and Applied Physiology

CRC Reviews in Toxicology

Journal of Toxicology and Environmental Health

Life Sciences Reviews

Toxicological Pathology

Risk Analysis

NATIONAL & INTERNATIONAL ADVISORY COMMITTEES, SCIENTIFIC MEETING ORGANIZER, AND INVITED SPEAKER

Session co-chair: “Advances in Thresholds of Toxicological Concern (TTC): Expansion of Databases to Support New Chemical Space.” Also presented: “Integration of NAM data to identify chemical substances with endocrine disruptor properties under ECHA/EFSA guidance.” 44th Annual Winter Meeting, the Toxicology Forum, Tysons, VA, January 2020.

44th Annual Summer Meeting of the Toxicology Forum (2018). Kinetically-Derived Maximum Dose: A Key Initiating Event Impacting Need for Mode of Action Investigations of High-Dose Specific Toxicity (Presenter).

42nd Annual Winter Meeting of the Toxicology Forum (2018). Key Characteristics of Carcinogens: Refining Approaches to Systematic Evaluations of Mechanistic Data (Session Chair); Identification of Mechanistic Data According to Key Characteristics of Carcinogens (KCC) and Review of Studies for Reliability, Relevance, and Activity (Presenter).

American College of Toxicology, Advanced Comprehensive Toxicology Class—Lecture on Kidney Toxicology, August 2017.

42nd Annual Summer Meeting of the Toxicology Forum (2016). Update: Organization and Review of Mechanistic Data According to “Ten Key Characteristics of Carcinogens” (TKCC) (Presenter).

International Agency for Research on Cancer (IARC) — Observer for Monograph on the Evaluation of Carcinogenic Risks to Humans, Volume 115: Some Industrial Chemicals. Lyon, France, 2–9 February 2016.

American College of Toxicology Annual Meeting, November 2013, San Antonio, TX

Session Co-Chair of “Prospective and Retrospective Approaches to Characterize Potential Neurotoxicity”

Invited Speaker of session titled, "Endocrine Disruption Screening — Status of the USEPA and EU programs: State of the Science and Slate for the Future"

Co-Organizer and Session Chair Symposium titled, "Population Diversity Mouse Models and their Use in Toxicology." Toxicology Forum, Aspen, CO, July 2013.

Co-Organizer and Session Chair of a Workshop titled, "Lessons Learned, Challenges, and Opportunities: The US Endocrine Disruptor Screening Program." April 22–23, 2013, Research Triangle Park, NC.

Invited Speaker, Toxicology Forum Meeting, January 2012, "Using a Rat MTBE PBPK Model as a Tool to Evaluate: Mode-of-Action and Route to Route Extrapolation."

Grant reviewer, "Engineered Nanomaterials: Linking Physical and Chemical Properties to Biology (U19)," NIEHS (2010).

Invited Speaker — REACH Symposium, "Fulfilling Technical Requirements." Society of Toxicology presentation (2008).

Ad hoc member of the Voluntary Children's Chemical Evaluation Program (VCCEP) panel to review the assessment of ethylbenzene prepared by the American Chemistry Council (February 2007).

Reviewer on NIEHS Special Emphasis Panel for Absorption, Distribution, Metabolism and Excretion (ADME) Chemical Disposition in Mammals (RFP NIH ES-06-01) (August 17–18, 2006).

USEPA Science Advisory Board — Environmental Health Committee, Consultant on the Trichloroethylene Health Risk Assessment: Synthesis and Characterization Review Panel (June 2002).

International Agency for Research on Cancer (IARC) — Working Group Member for Monograph on the Evaluation of Carcinogenic Risks to Humans, Vol. 82, "Traditional Herbal Medicines, Some Mycotoxins, Naphthalene and Styrene" (2002).

International Agency for Research on Cancer (IARC) — Working Group Member for Monograph on the Evaluation of Carcinogenic Risks to Humans, Vol. 77, "Some Industrial Chemicals" (2000).

European Centre for Ecotoxicology and Toxicology of Chemicals (ECETOC) — Corresponding member on the MTBE Risk Assessment Document (2000).

USEPA. Invited participant and presenter, Workshop on MTBE Pharmacokinetic-Based Extrapolation (May 2000).

Invited participant in a meeting of the ECETOC Task Force on MTBE Risk Assessment and the Finnish Competent Authorities preparing the European Union's Risk Assessment of MTBE (May 2000).

Invited Speaker, Novartis Crop Protection AG, Basel Switzerland, "Criteria for Evaluating the Ability of a Chemical to Cause α 2u-Globulin-Mediated Renal Tumors in Male Rats," (November 1999)

Society of Toxicology Annual Meeting — Organizer, Co-Chair, and participant of the symposium titled, "Aliphatic Ethers as Fuel Oxygenates: Health Effects and Regulatory Issues" (March 1999).

Reviewer of NIEHS Superfund Basic Research Program Grant (October 1999).

International Agency for Research on Cancer (IARC) — Working Group Member for Monograph on the Evaluation of Carcinogenic Risks to Humans, Vol. 73, "Some Agents that Cause Tumors of the Kidney, or Urinary Bladder in Rodents and some other Substances" (1998).

Invited Toxicology Scholar Colloquium Speaker, Center for Biochemical Toxicology, University of Connecticut, "The use of mechanistic information in risk assessment-chemical induced α 2u-globulin mediated renal tumors." May 1998.

Invited Participant — Finnish Institute of Occupational Health, Helsinki, Finland, “Mechanism of MTBE-induced renal tumors in male rats.” October 1998.

Invited Participant – Office of Environmental Health Hazard Assessment, Sacramento, CA, “Mechanism of MTBE-induced tumors in rodents.” July 22, 1998.

European Centre for Ecotoxicology and Toxicology of Chemicals (ECETOC) — Member of the task force preparing a document on Toxicological Mechanisms (1997–2001).

International Program on Chemical Safety, Methyl Tertiary Butyl Ether, Sponsored by Health Canada. (March 1997).

Workshop to Provide Guidance on the Feasibility and Design of Epidemiologic Studies among Populations Exposed to MTBE. Sponsored by the USEPA, Panelist (April 4–5, 1995).

Industry Briefing on Oxyfuel Studies. USEPA, Washington D.C., Presenter (April 1995).

Potential Acute Health Effects of Oxygenates in Fuels: A Workshop of the Health Effects Institute Oxygenates Review, Chicago, IL. Presenter — Pharmacokinetics of MTBE Across Species (July 1995).

Oxyfuels Information Needs. USEPA, Washington D.C., Presenter (September 1995).

SELECTED ABSTRACTS AND PRESENTATIONS

Borghoff SJ, Feifarek D, Mihalchik A, Heintz M, Haws L, Nyambego H, Goyak K, Lea IA. Evaluation of the endocrine disrupting potential of di-isodecyl phthalate. Abstract 3931, Society of Toxicology Annual Meeting, Salt Lake City, UT, March 2024.

Lea IA, Feifarek D, Mihalchik A, Heintz M, Haws L, Nyambego H, Goyak K, **Borghoff SJ**. Evaluation of the endocrine disrupting potential of di-isodecyl phthalate. Abstract 3930, Society of Toxicology Annual Meeting, Salt Lake City, UT, March 2024.

Lynn SG, Lea IA, Urban J, **Borghoff SJ**, Wikoff D, Fitch S, Perry C, Choksi N, Britt J, Heintz M, Klaren W, et al. Development and application of systematic approach to inventory and interrogate thyroid hormone network information. Abstract 4357, Society of Toxicology Annual Meeting, Salt Lake City, UT, March 2024.

Nelms M, Antonijevic T, Ring C, Harris D, Bever RJ,... **Borghoff S**, et al. Chemistry domain of applicability evaluation of estrogen receptor high-throughput assay-based activity models. Abstract 4380, Society of Toxicology Annual Meeting, Salt Lake City, UT, March 2024.

Edwards S, Antonijevic T, Nelms M, Ring C, Harris D,... **Borghoff S**, Markey K. Development and application of a systematic approach to inventory and interrogate thyroid hormone network information. Abstract 4381, Society of Toxicology Annual Meeting, Salt Lake City, UT, March 2024.

Lea IA, Heintz MM, Feifarek D, Haws LC, **Borghoff SJ**. Weight-of-evidence evaluation of endocrine activity for di-isodecyl phthalate (DIDP) and di-isononyl phthalate (DINP). Poster presented at Society of Toxicology Annual Meeting, Nashville, TN, March 2023.

Wikoff D, Edwards S, Angrish M, Baumgartner, Bever R, **Borghoff S**, Chappell G, Chew R, Fitch S, Hench G, Hamernik K, Henderson D, Kirk A, Lea I, Mandel M, Payne L, Shapiro S, Urban J, Williams D, Markey K. Application of systematic methods to characterize thyroid adverse outcome pathways (AOPs). Presented at 10th annual meeting of American Society for Cellular and Computational Toxicology (virtual), October 2021.

Borghoff SJ. Integration of NAM data to identify chemical substances with endocrine disruptor properties under ECHA/EFSA guidance. Presentation to Toxicology Forum virtual meeting, August 2020.

Franzen A, **Borghoff SJ**. An adverse outcome pathway for renal tumors in male rats through chemical induction of α 2u-globuline (α 2u) nephropathy (α 2u-N). Poster for Society of Toxicology, Virtual Annual Meeting, 2020.

Borghoff S, Fitch S, Britt J, Franke K, Wikoff D. Application of the EFSA/ECHA endocrine disruption guidance as a framework for evidence integration in a weight-of-evidence (WoE) analysis for oxybenzone (BP-3). Poster at Evidence Integration in Chemical Assessments: Challenges Faced in Developing and Communicating Human Health Effect Conclusions. National Academies of Sciences, Engineering, and Medicine, Washington, DC, June 2019.

Borghoff SJ, Fitch S, Huggett, Wikoff D. A hypothesis-driven weight-of-evidence analysis to evaluate potential endocrine disrupting properties of perfluorohexanoic acid (PFHxA). 2019. Poster at Society of Toxicology Annual Meeting, Baltimore, Maryland, March 2019.

McIntyre B, Zorilla L, **Borghoff, S**, Foster P. Assessment of avobenzene, ensulizole, homosalate, and padimate-O in endocrine disruptor screening panel studies. Poster at Society of Toxicology Annual Meeting, Baltimore, Maryland, March 2019.

Borghoff S, Wikoff D, Urban JD, Rager J. A systematic approach to identify plausible mode-of-actions (MOA) for an increased incidence of lung tumors in mice with chronic exposure to 4-methylimidazole (4-MEI). Society of Toxicology Annual Meeting, San Antonio, Texas, March 11–15, 2018.

Wikoff DS, Rager JE, Harvey S, Haws L, Chappell G, **Borghoff S**. Development and refinement of a framework for quantitative consideration of study quality and relevance in the evaluation of mechanistic data based on Key Characteristics of Carcinogens. Society of Risk Analysis Annual Meeting, Arlington, Virginia, December 10–14, 2017.

Huggett D, Harvey S, Korzeniowski S, **Borghoff SJ**. The potential for 6:2 FTOH to modulate the endocrine system in wildlife: A hypothesis driven weight of evidence analysis across endocrine pathways. SETAC North America 38th Annual Meeting, Minneapolis, Minnesota, November 13–16, 2017.

Borghoff SJ, Harvey S, Korzeniowski S, Huggett D. The potential for PFHxA to modulate the endocrine system in wildlife: A hypothesis driven weight of evidence analysis across endocrine pathways. SETAC North America 38th Annual Meeting, Minneapolis, Minnesota, November 13–16, 2017.

Borghoff SJ, Ring C, Banton MI, Leavens TL. Ethyl tertiary butyl ether (ETBE) and tertiary butyl alcohol (TBA) physiologically-based pharmacokinetic (PBPK) model in rats: Contribution of binding to α 2u-globulin and non-linear kinetics to kidney and liver responses in rats. Poster presented at Society of Toxicology Annual Meeting, Baltimore, Maryland, March 16, 2017.

Wikoff DS, Rager J, Harvey S, Haws L, Chappell G, **Borghoff S**. Framework for quantitative consideration of study quality and relevance in the systematic evaluation of mechanistic data per the Ten Key Characteristics of Carcinogens. Poster presented at Society of Toxicology Annual Meeting, Baltimore, Maryland, March 15, 2017.

DeVito MJ, **Borghoff SJ**, Zorrilla L, Shockley KR, Kissling G, Travlos G. The effects of a high fat (HF) diet on male diversity of outbred (DO) mice. Presented at the Society of Toxicology's 55th Annual Meeting, New Orleans, Louisiana, March 13-17, 2016.

Wikoff D, **Borghoff S**, Rager JE, Haws LC. Human relevance assessment of tetrabromobisphenol-A (TBBPA) induced uterine adenocarcinomas: Mode of action dependent on high dose molecular initiating event (MIE). Presented at the Society of Toxicology's 55th Annual Meeting, New Orleans, Louisiana, March 13-17, 2016.

Borghoff S, Wikoff D, Rager JE, Haws LC. Tetrabromobisphenol-A (TBBPA): Dose- and time-dependent changes in plasma TBBPA and its conjugates over 28 days of administration. Presented at the Society of Toxicology's 55th Annual Meeting, New Orleans, Louisiana, March 13-17, 2016.

Wikoff D, White MC, **Borghoff SJ**, Haws LC. Evaluation of tetrabromobisphenol A (TBBPA)-induced endocrine-related target gene activity using high-throughput screening data from ToxCast. Presented at the Society of Toxicology's 54th Annual Meeting, San Diego, California, March 22-26, 2015.

Borghoff S, Wikoff D, White MC, Thompson CM, Haws LC. Identification of the molecular initiating event (MIE) for TBBPA-induced uterine tumors in the framework of an adverse outcome pathway (AOP). Presented at the Society of Toxicology's 54th Annual Meeting, San Diego, California, March 22-26, 2015.
